Project Management 40 Hours

Six Sigma Black Belt 200 Hours

Dual enrollment fee \$3795 or Second program discount (GES \$95 discount)

One year program

240 Clock Hours

The purpose of the Advanced Project Management program is to help our students learn and understand project management as a discipline and a profession that rests with practitioners who apply and practice it similar to the way in which a lawyer applies and practices law or a doctor applies and practices medicine. With the Six Sigma Black Belt training, this program also encompasses all aspects of running a Six Sigma Black Belt business. Six Sigma is one of the highest standards for companies and individuals to achieve, and this interactive online training program provides the skills needed to master this highly valuable skill. The program's objective is to provide a solid introduction to the understanding of project management, and to also learn how the use of project management will benefit you in your personal and professional life.

The program also integrates Six Sigma Green and Black Belt online learning with hands-on data analysis. The material provides an in-depth look at the Six Sigma Black Belt DMAIC problem-solving methodology, as well as deployment and project development approaches.
